Dear Hiring Team at JPMorgan Chase,

I am excited to apply for the 2025 Emerging Talent Software Engineers program at JPMorgan Chase. With a Bachelor's degree in Computer Science and recent completion of rigorous bootcamps at Per Scholas and Georgia Institute of Technology, I am eager to bring my passion for innovative software development and my technical expertise to your team.

During my training, I developed a responsive job application tracker, **Gin Job Tracker**, utilizing Java, Spring Boot, MySQL, and Hibernate within the MVC architecture. This project exemplifies my ability to build solutions that address real-world challenges. Additionally, my work on **ResuMade**, a professional-grade resume generator, highlights my commitment to improving user experiences through thoughtful design and efficient coding practices.

My technical foundation includes:

- **Programming:** Proficient in Java, JavaScript, Node.js, and front-end technologies like HTML5 and CSS3.
- **Frameworks and Tools:** Experienced with Spring Boot, React.js, Hibernate, JPA, and RESTful APIs.
- **Development Practices:** Skilled in Agile methodologies, CI/CD pipelines, and version control systems like Git.

Beyond technical skills, my experience managing operations and IT support at Allure Nail & Bar honed my ability to collaborate with diverse teams, communicate effectively, and lead projects from concept to implementation. These skills align closely with the values of collaboration and innovation emphasized in your program.

JPMorgan Chase's commitment to fostering career growth and creating solutions that drive positive change resonates deeply with my aspirations. I am particularly drawn to the program's emphasis on mentorship, real-world projects, and professional development, and I am eager to contribute my skills to your impactful initiatives.

Thank you for considering my application. I would be honored to join JPMorgan Chase's innovative team and would welcome the opportunity to discuss how my background and skills align with your goals.

Best regards,
Tho (Arthur) Ong
